

Rakon Corporate Environmental Policy

Rakon is a world leader in the development of frequency control solutions for a wide range of applications. Rakon has leading market positions in the supply of crystal oscillators to the GPS, telecommunications network, timing/synchronization and aerospace markets.

Rakon recognises the importance of protecting the environment and achieves environmental best practice through the following:

- Implementation and maintenance of an Environmental Management System (EMS). As part of the EMS, Rakon seeks to deliver continuous environmental improvement and maintain business excellence.
- Acting as a responsible company citizen and maintaining compliance to any applicable laws and regulations relating to the protection of the environment and the welfare of its employees. Rakon is focused on meeting our customers' expectations and reserves the right to adhere to requirements or standards which exceed those of any applicable laws and regulations.
- Endeavouring to minimise, reuse, recycle and/or use appropriate methods to dispose of and treat our wastes to prevent pollution.
- Concern regarding the protection of the world's environment and seeking to be efficient in its use of energy and natural resources.
- Encouraging the creation of environmentally friendly products and technologies through its design and development processes.
